

Wan Chen

She works in the magnet group of the accelerator division in the Institute of High Energy Physics CAS, China. She has participated in big scientific projects such as BEPCII, SCNS, HEPS-TF, PAPS etc. She has undertaken or been responsible for the development of the magnetic field measurement systems for accelerator magnet, AC magnet, superconducting magnet and insert devices in those projects. Now she is responsible for the development of the magnetic field measurement equipment and the magnetic field measurement of insert devices in HEPS.
