

Mirko Kokole graduated in physics and astronomy from Faculty of Mathematics and Physics in Ljubljana in 2007. His professional career started in 2004 when he was employed at Josef Stefan Institute in Ljubljana as a technical support person. After graduation he continued his employment at JSI as full-time researcher. In 2008 he shortly joined Cosylab and in 2009 transitioned to Kyma. He is now the lead physicist at Kyma, a company dedicated to design and manufacture of insertion devices. He is responsible for magnetic design and measurements and acquisition of permanent magnets.
